

Acsaven — Same-day launch order

Batch marketing for Product Hunt, directories, and maker platforms. No multi-day wait. Captions: `brand/launches/{product}.md`

1. Platform order + URLs

#	Platform	URL	Tip
1	GitHub	https://github.com/acsavenhq	README / Discussion first — you control it
2	AlternativeTo	https://alternativeto.net/software/new/	Batch all free tools
3	SaaSHub	https://www.saashub.com/submit	Same batch
4	Unneed	https://www.unneed.best/submit-a-tool	Same batch
5	BetaList	https://betalist.com/submit	May review — submit early
6	Peerlist	https://peerlist.io/launch	Project launches
7	Indie Hackers	https://www.indiehackers.com/products/new	Product pages
8	Dev.to	https://dev.to/new	Paste from each product .md Dev.to body
9	Product Hunt	https://www.producthunt.com/posts/new	Prefer schedule 12:01 AM PT; TryTokka first if only one PH today
10	Hacker News	https://news.ycombinator.com/submit	Title must start Show HN: — after PH or for a different product

Full checklist: <https://acsaven.com/brand/launches/CHECKLIST.md>

2. Product order (same day)

1. **TryQuickImg** — <https://tryquickimg.com/>
2. **TryDevSnip** — <https://trydevsnip.com/>
3. **TryCalculatingNow** — <https://trycalculatingnow.com/>
4. **TryTokka** — <https://trytokka.com/> (PH + Indie Hackers priority)
5. **Acsaven** (soft) — <https://acsaven.com/>

3. Bookmark strip

```
https://github.com/acsavenhq
https://alternativeto.net/software/new/
https://www.saashub.com/submit
https://www.unneed.best/submit-a-tool
https://betalist.com/submit
https://peerlist.io/launch
https://www.indiehackers.com/products/new
https://dev.to/new
```

<https://www.producthunt.com/posts/new>
<https://news.ycombinator.com/submit>

Only hard rule today: don't put TryTokka on Product Hunt and Show HN in the same hour — Product Hunt first, Hacker News later (or Show HN for TryDevSnip instead).
